# Calina Accompagnement

Final Website

# Project Overview

- Real client website
- One-page responsive design
- Calm and emotionally supportive experience
- Helps users understand services and book sessions

## Tech Stack:

1. HTML5
2. Bootstrap 5
3. Custom CSS
4. Vanilla JavaScript

# Project Progress

- Deliverable 1

  Proposal (idea, audience, goals)

- Deliverable 2

  Sitemap, wireframe, Bootstrap structure

- Deliverable 3

  Final website with styling and functionality

# Bootstrap Usage

Bootstrap Implementation

- **Bootstrap is loaded via CDN for faster setup and performance**
- Used as the main framework
- Responsive layout (container, row, col)
- Bootstrap Components:
  - **Navbar + Collapse** — section navigation and responsive hamburger menu
  - **Cards** — organize session content and improve readability
  - **Accordion** — expandable FAQ answers
  - **Modal** — shows Terms & Conditions without leaving the page
  - **Buttons** — call-to-action and interaction controls
  - **Badge** — labels session categories
  - **Toast** — quick feedback after form interaction

# Custom Styling

## Custom Design & CSS

- Custom color palette
- Times New Roman typography
- Soft spacing and layout
- Dark mode support
- Hover effects and animations
- Paper texture and visual identity

# JavaScript Functionality

- JavaScript enhances interactivity, dynamic behavior, and user experience without reloading the page

- **Language Toggle** — switches EN/FR content dynamically
- **Dark Mode** — changes theme and saves user preference
- **Form Validation** — checks fields and email format
- **Character Counter** — enforces the message limit
- **Toast Logic** — displays success or error feedback
- **Scroll Reveal** — adds progressive section animation
- **UI State Updates** — logo/theme syncing, navbar behavior, modal blur

User Experience & Responsiveness

# User Experience

- Fully responsive design
- Clean navigation flow
- Clear content hierarchy
- Accessible structure (semantic HTML, ARIA)
- Smooth scrolling and transitions

# Challenges & Learning

- Balancing Bootstrap structure with custom design
- Managing bilingual dynamic content
- Debugging dark mode readability issues
- Implementing realistic form validation and feedback

# Reflection

- Built a complete real client website
- Improved coding confidence
- Applied class concepts in real project
- Learned to combine design + development
- Developed problem-solving skills

# Q & A
